01. ABOUT ICA

- **2012** ICA (I Cotoni di Albini S.p.A.) was born as a spin-off of the Albini Group dedicated to the production of yarns made with natural, noble and sustainable fibres
- **HQ** in Italy
- **1** spinning mill
- **2** directly managed spinning mills
- **112** product categories
- **3.300** acres of controlled cotton fields

Yarns Range

SUPIMA® 100% or in blend with:

CASHMERE WOOL SILK LINEN HEMP KAPOK SEACELL COOLMAX

West Indian Sea Island cotton 100% or in blend with:

CASHMERE WOOL SILK

US ULTIMA + CASHMERE or SILK or LINEN

BIOFUSION® - RETWIST® REGENERATIVE

100% Cotton Medium, Fine & Extrafine Counts: from ne 20/1 up to ne265/1

Modal + Cashmere or Silk or Linen or Seacell

Tencel + Cashmere or Silk or Linen or Seacell

>>Some of the above items are available in melange<<

FOR THE DETAILED LIST PLEASE CHECK OUT OUR WEBSITE WWW.ICOTONIDIALBINI.COM

02. A SUSTAINABLE APPROACH

Since more than a decade we have a clear vision on sustainability, which is oriented at:

1. Sustainable materials

Organic, recycled & eco-friendly materials

2. Supply chain control

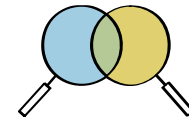

Transparency & traceability

3. Social responsibility

Respect & enhancement of people

Sustainable

Transparency

Ethics

BIOFUSION®

What is Biofusion?

BIOFUSION® is a blend of American organic cottons (SUPIMA® & Cotton USA™) exclusively grown by the Albini Group.

BIOFUSION® is scientifically traceable thanks to an innovative method based on forensic science.

Albini Group directly manages and controls **BIOFUSION®** cotton farms with the aim of ensuring:

- Full compliance with the law
- High quality standards
- Traceability of the production chain

Organic
raw material

Scientifically
traceable

Albini
exclusive

What makes a cotton “organic”?

To be defined as “organic”, a cotton must come from organic plantations that meet the following requirements:

- The cultivated land has produced exclusively organic products for the previous three years
- The seed is GMO-free
- Chemical fertilizers, insecticides and pesticides are not used
- The defoliation is natural

The cultivation methods of **BIOFUSION®** cotton strictly follow all these requirements.

*What is behind **BIOFUSION**® project?*

The project finds its roots in:

- The experience acquired in the selection of the best raw materials and in the direct cultivation of cotton in Egypt, Barbados and the United States
- The close collaboration with eight SUPIMA® farmers located in Texas, New Mexico and California
- The need to have an organic and traceable cotton, which is ethically grown and of the highest quality

A SUSTAINABLE APPROACH

The growers of SUPIMA® & Cotton USA™ :

Alvarez Farms - New Mexico

Cohen - New Mexico

Curry - New Mexico

Duran & Sons - New Mexico

Pajaro Farms - New Mexico

Sun Country Farm - Texas

Ted Sheely - California

Willie Loewer - Texas

BIOFUSION®
TRACED ORGANIC COTTON

BIOFUSION

Which certifications?

- **BIOFUSION**[®] yarns are certified by Global Organic Textile Standard (GOTS), which guarantees the products are made with organic cotton.
- **BIOFUSION**[®] cotton is scientifically traceable by Oritain[™], a third-party certifier and world leader in forensic science. This ensures the tracing of the origin at all stages of the production process.
- Supima inspects and certifies the origin of each yarn with Supima[®] trademark.

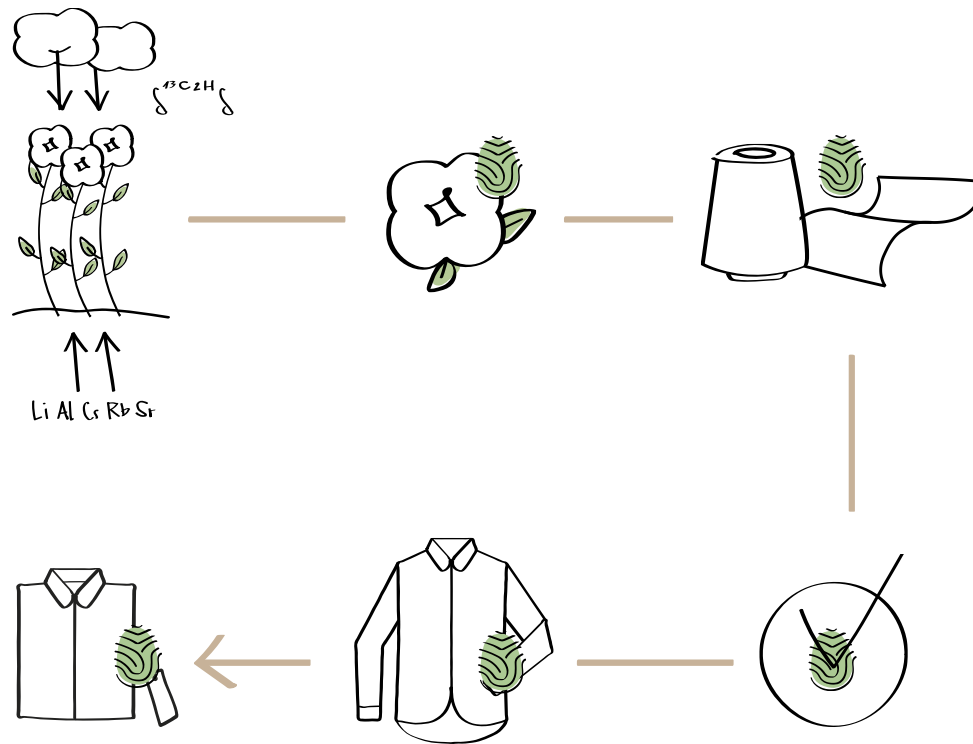

Traceability: how does it work?

1. Cotton samples are collected from the crop field
2. Samples are analyzed by Oritain™ using forensic science
3. Data are transformed into a unique fingerprint for that cotton
4. The product can be checked at any stage of the production chain to verify that it is compatible with its original fingerprint
5. Only an exact match proves that the product is authentic

BIOFUSION® is traceable from the field to the final product, as a guarantee of its:

- Origin
- Quality
- Ethical and sustainable production

A SUSTAINABLE APPROACH

BIOFUSION[®]
TRACED ORGANIC COTTON

Traceability: what can you get?

- **On a B2B level:** we can supply you with the “Verification of Origin” by Oritain™ for the yarn
- **On a B2C level:** you can work together with Oritain™ to obtain the certification also for the garment

THANK YOU
